Business
Cooperative Research
Centres Programme

Scope

Background

- The Natural Hazard Exposure Information Framework, completed in July 2017, was developed based on a wide range of end user requirements and highlights existing data availability and gaps.
- The objective of the framework was to fully describe and categories exposure information elements in a consistent framework to be use for reference in developing future exposure systems

Aim

- The utilisation extension to this project was aimed to align Geoscience Australia's National Exposure Information System (NEXIS) and other spatial data capabilities with a range of key elements from the Natural Hazard Exposure Information Framework, to develop a web-based tool to discover and access a broader range of exposure information on a national scale.
- A tool designed to allow end-users to customise their spatial area of interest and exposure information content.
- Access to nationally consistent, easily accessible exposure information to benefit emergency management situation awareness, risk assessments, forecasts and research for impact analysis.
- Ultimately to help to provide information to enable better decisions by emergency managers, government and other to reduce loss of life and economic impact.

AUSTRALIAN EXPOSURE INFORMATION PLATFORM

UNCOVERING NATIONAL EXPOSURE

Access to nationally consistent exposure information is fundamental for all decision makers. The Australian Exposure Information Platform (AEIP) provides information on building, businesses and people; public facilities and infrastructure assets; agricultural commodities, and environmental holdings within Australia.

Demographics

Building Exposure, V9 September 2017		Dwelling estimates where residents:		
	Event	Demographic*	Event	NSW(Av)
Population count	35,718	Are all aged 65 or over	13.8%	17.4%
Dwelling count	15,070	Includes persons aged 14 years and under	27.9%	25.3%
Building count	13,014	Includes an Indigenous person	7.4%	3.6%
Pre 1980 construction count	1,908	Are a single parent family	6.2%	5.4%
Pre 1990 probable asbestos containing products**	4,708	Are in need of assistance for self-care activities	9.5%	10.5%
Reconstruction value	55,104,140,000	Include persons not proficient in English	0%	1.3%
Contents value	51,026,310,000	Do not have access to a motor vehicle	4.8%	9.7%
Completed	540	No one has completed Year 12 or higher	23.0%	15.5%
Under construction	53,992,550,000	Moved to the region in the last 1 year	8.5%	11%
Under construction	412	Moved to the region in the last 5 years	20.4%	30%
Reconstruction value	51,618,950,000	Top 5 employing industry*:		
2011 SEIFA IRSAD*	-	ABS Census 2016 data not available for this release		
Dwellings in area with a SEIFA decile 10 score (most advantaged)	-	Economic*	Event	NSW (Av)
Dwellings in area with a SEIFA decile 9 score	1,500	Are low income (\$1,499/week)	22.6%	23.8%
Dwellings in area with a SEIFA decile 8 score	2,662	Are medium income (\$1,500-\$1,499/week)	52.2%	51.5%
Dwellings in area with a SEIFA decile 7 score	1,052	Are high income (\$1,500/week)	24.1%	23.4%
Dwellings in area with a SEIFA decile 6 score	1,296	Are in public housing	6.4%	4.8%
Dwellings in area with a SEIFA decile 5 score	2,012	Are all unemployed	1.1%	0.9%
Dwellings in area with a SEIFA decile 4 score	3,832	*Residential demographic information is not provided for dwelling counts less than 20		
Dwellings in area with a SEIFA decile 3 score	468	**Buildings may contain asbestos materials, especially in the eaves, internal and external wall cladding, ceiling, roof sheeting, and wet areas such as bathrooms and showers, and fences		
Dwellings in area with a SEIFA decile 2 score	412			
Dwellings in area with a SEIFA decile 1 score (most disadvantaged)	1,836			
Dwellings in area without a SEIFA score	-

Environmental

Exposure Report Job ID: 13972

This report is a summary of agricultural, building, business, demographic, institution, infrastructure and environmental exposure information within the area of

The exposure information in this report is sourced from:
Agricultural Exposure: The list of agricultural commodities and estimated value is based on the Australian Bureau of Statistics (ABS) Value of Agricultural Commodities Produced (VACP) 2014-15, and Agricultural Commodity Estimates by Region 2011. www.ga.gov.au/metadate-gateway/metadate/record/gcat_82222
Building Exposure: Residential, Commercial and Industrial exposure information is collated from a variety of best and publicly available data. Building reconstruction and contents values are adjusted to March 2017 costings. www.ga.gov.au/metadate-gateway/metadate/record/gcat_82220
Business Exposure: The Australian Business Register is a comprehensive database of identity information provided by businesses and other organisations when they register for an Australian Business Number (ABN). It provides information on the type of businesses, type of primary producers and not-for-profit organisations by ANZSIC Classifications. The data is based on the main business location of the registration. <https://abr.gov.au/About-us/Our-work/The-ABR-explained/>
Demographic Exposure: Demographic exposure applies the ABS 2016 Census statistics and ABS 2011 Social-economic Indexes For Areas - Index of Relative Socio-economic Advantage and Disadvantage (SEIFA IRSA) to a NEXIS building location. Some areas cannot be assigned a score because the population is too small or the quality of the data is not good enough.
Institution Exposure: Institution asset data is collected through a variety of best available data. This data is either not available publicly because they are government departmental data and or commercially available data products.

Infrastructure Exposure: Infrastructure asset data is collected through a variety of best and publicly available data. www.ga.gov.au/scientific-topics/national-location-information/built-environment-and-exposure
Environmental Exposure: Environmental data is sourced from the Department of Environment and Energy, and represents the most recently released publicly available data. www.environment.gov.au

The ABS Australian Statistical Geography Standard (ASGS) provides an approximation of officially gazetted Local Government Areas (LGA) 2017, as defined by each State and Territory, and Urban Centres and Localities (UCL) 2016 where population is greater than 200. [www.abs.gov.au/websteds/D3310114.nsf/home/Australian+Statistical+Geography+Standard+\(ASGS\)](http://www.abs.gov.au/websteds/D3310114.nsf/home/Australian+Statistical+Geography+Standard+(ASGS))
