

# Disaster and economic resilience in Small Regional Communities: The case of Toodyay

Research advisory forum / **2019**

**Prof Mehmet Ulubasoglu /**

Department of Economics  
Centre for Energy, the Environment and Natural Disasters  
Deakin University

 @bnhcrc  @bnhcrc

**Business**  
Cooperative Research  
Centres Programme

# Aims

## WHO IS AFFECTED?

- What are the economic impact of natural disasters on individuals?
- If there was an effect, did it differ according to who they were (**demographic** attributes) and **industries** they worked in

## HOW ARE THEY AFFECTED?

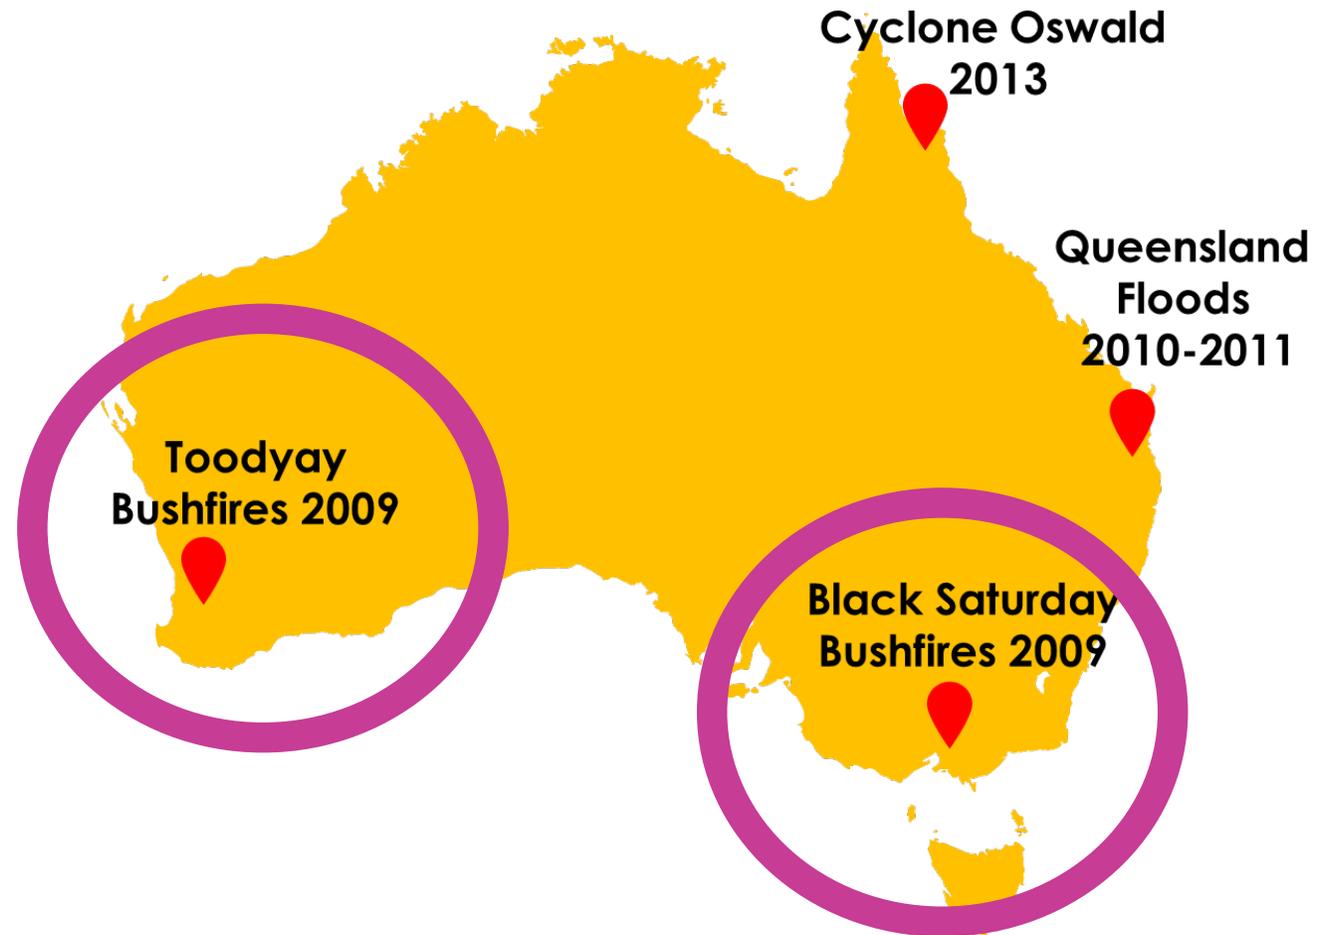

- What was the disaster's effect on the income trajectory of individuals in the disaster-hit areas?

## WHAT CAN BE DONE TO HELP?

- How can we optimise and inform a sustainable disaster recovery model?

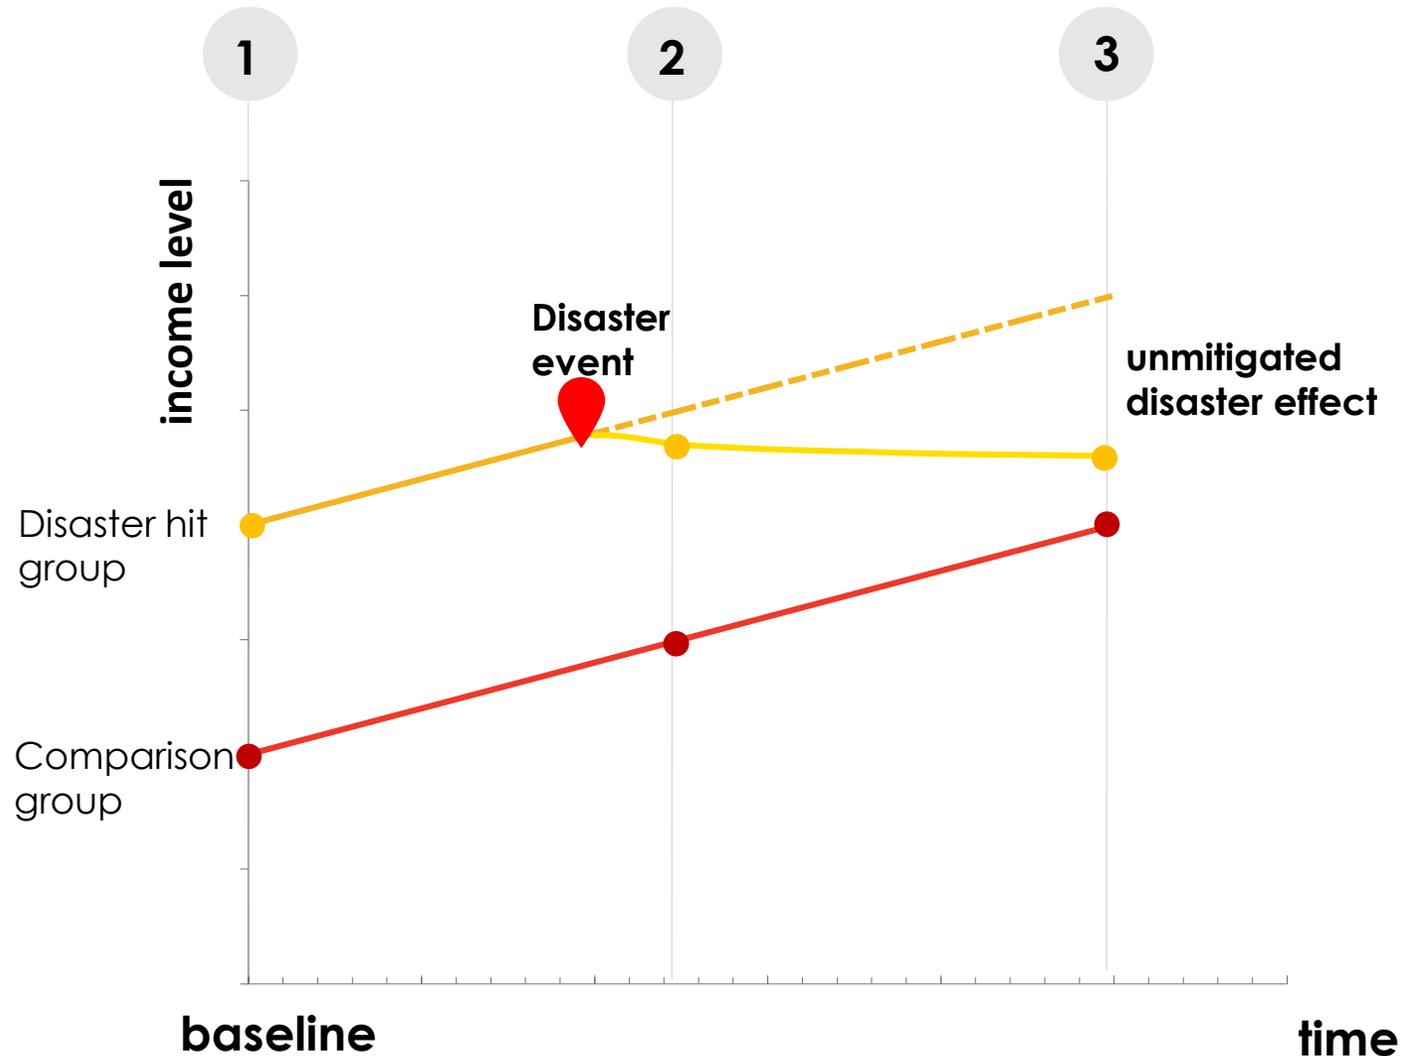

# Case studies

- **Four case studies** of various types and sizes to illustrate the value of this model
- **End-users** guiding research design for each case study are corresponding state agencies

# Measuring the impact

- Difference-in-difference model
- ABS Census 2006, 2011 and 2016

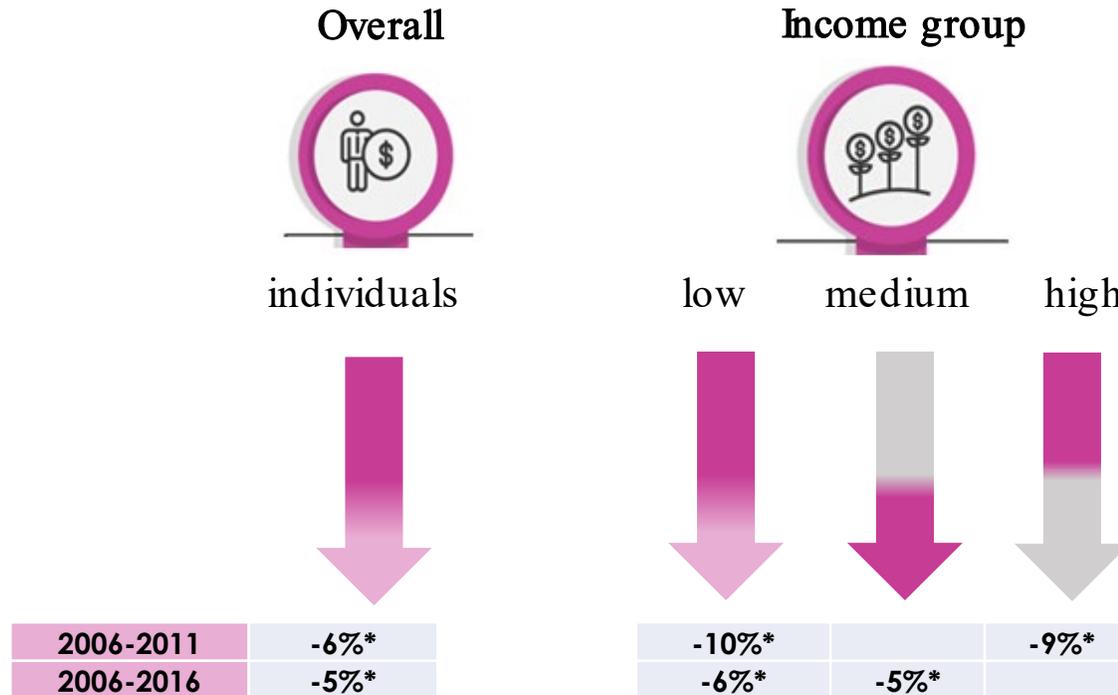

# The Big Five

1. **Looking at averages is informative, but the devil is in the details.** Socioeconomic characteristics and sectors of employment matter and dictate the effect on individual income that disasters can have
2. **Clear patterns emerge on who in the community are affected by disasters**
3. **Disasters can cause permanent migration** of individuals from their communities
4. **Reduced income and financial capabilities** are critical factors behind deteriorating mental health of disaster-hit individuals
5. **There is room to rethink** how we build a sustainable disaster recovery model on limited budgets

# Black Saturday Bushfires

**Average** Individual income losses, by income group

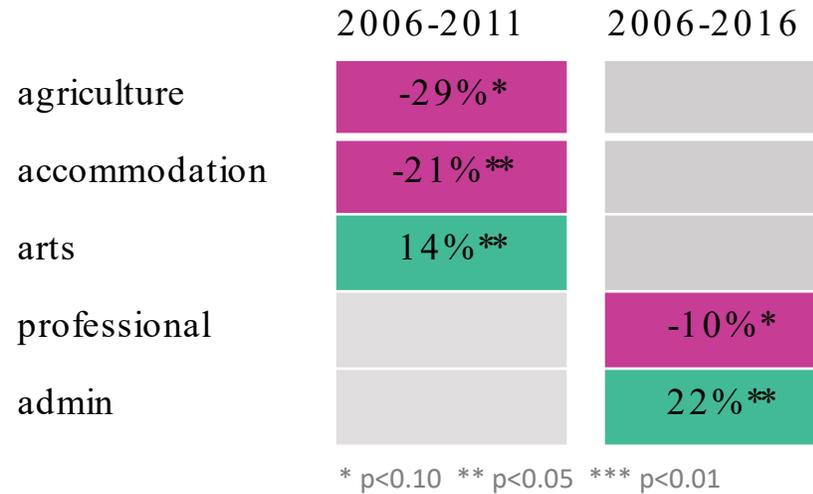

\* p<0.10 \*\* p<0.05 \*\*\* p<0.01

# Black Saturday Bushfires

**Average** Individual income losses by sectors of employment

## Strong evidence of effect

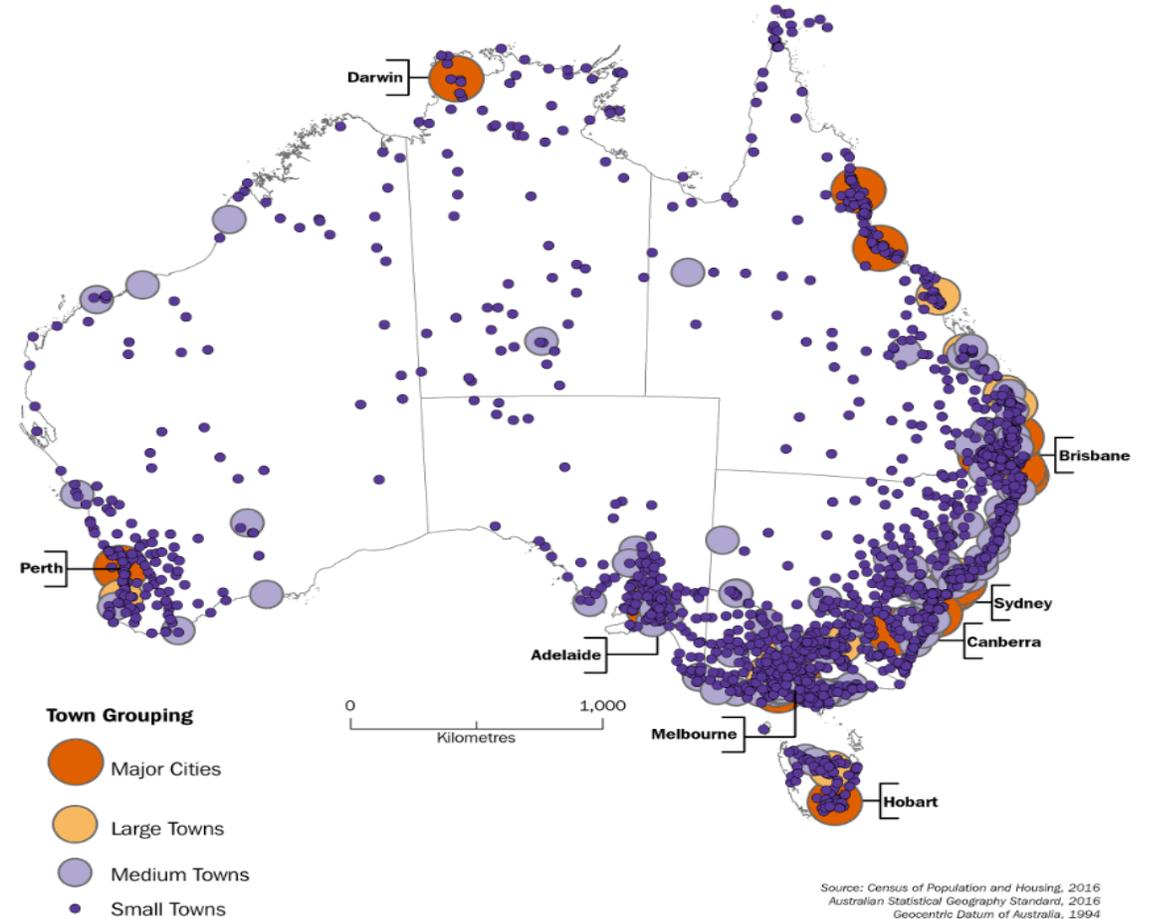

## Some evidence of effect

**| When your  
data can't  
model!**

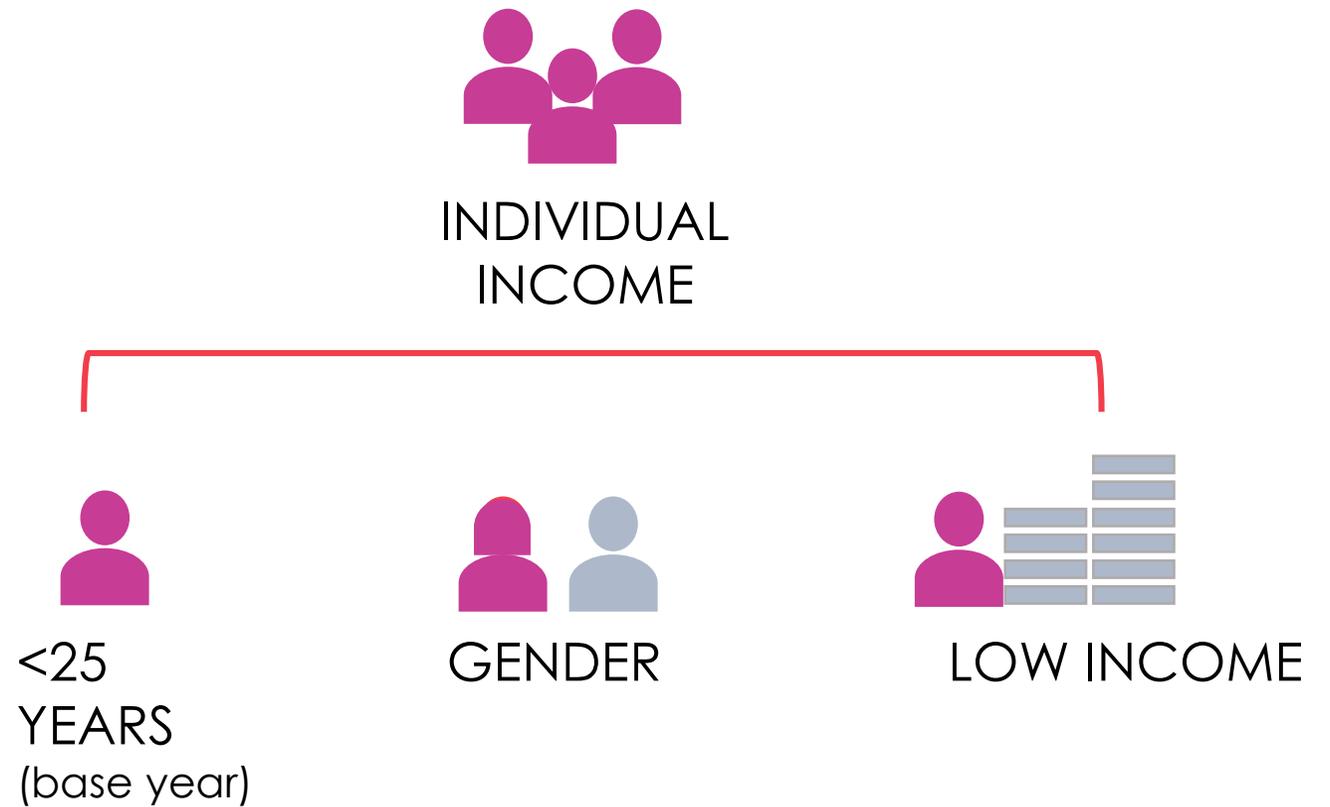

# Toodyay bushfires

Small towns like Toodyay form 9.7% of Australia's population

# **| Toodyay bushfires**

Modelling hampered  
by small sample size

# **Toodyay bushfires**

Demographic profiling  
uncovered  
valuable insights

**Hours to  
bring fire  
under control**

**% Toodyay SA2  
burnt**

**Employed  
residents work  
outside of  
Toodyay**

**Public assistance  
distributed within  
first three months**

# Thankyou

**Prof Mehmet Ulubasoglu**
