BUILDING COMMUNITY RESILIENCE IN NORTHERN AUSTRALIA

Scoping remote community resilience, building better governance, finding new opportunities to grow resilience

Jeremy Russell-Smith

Darwin Centre for Bushfire Research
Research Institute for the Environment & Livelihoods
Charles Darwin University, Northern Territory

An Australian Government Initiative

THE NORTH AUSTRALIAN BNH CONTEXT

750,000 People

- + Communities from 'outer regional' to 'very remote'.
 - + Remote communities mostly inhabited by indigenous Australians (% rises with remoteness)
 - + Poor infrastructure
 - + Disconnect with emergency management paradigm
 - + Poor infrastructure
 - + Low population densities
 - + Poor communications
 - + Low levels of formal education and training
 - + Limited labour market experience
 - + Poor health
- } The "Gap"
-

- = Almost no formal emergency management capacity
- = No spare capacity to fall back on
- = No "Plan B"
- = Very limited community resilience

BUILDING COMMUNITY RESILIENCE IN NORTHERN AUSTRALIA

Objective:

Using a ground-up approach, identify, test and trial opportunities to develop resilience in remote north Australian communities.

Key Component Projects:

- 1) Scoping remote north Australian community resilience and developing community governance models through action research
- 2) Development challenges and opportunities for building resilient remote communities in northern Australia (PES)

Direct links to north Australian Landscape Fire Management and Training projects

SCOPING RESILIENCE & BUILDING GOVERNANCE

Objectives:

- 1) Summarise the aspirations of communities for social and economic development and meeting cultural obligations & identify which are most vulnerable to natural hazards
- 2) Describe present approaches to dealing with natural hazards and outline Indigenous views of their appropriateness and effectiveness
- 3) Describe human capability, including skill sets and experience, formal institutions and social networks, presently available within participating communities
- 4) Develop an Indigenous view of options for improvement, emphasising approaches to make better use of and grow existing capability

PES OPPORTUNITIES FOR BUILDING RESILIENT REMOTE COMMUNITIES

Objectives

- 1) Articulate key contemporary land use management, institutional, and policy challenges facing Indigenous people and local communities in north Australia
- 2) Explore opportunities afforded through emerging economies related to climate change mitigation, carbon trading, and ecosystem services to help address identified challenges
- 3) to undertake rigorous valuation of Ecosystem Services (ES) & Payment for Environmental Service (PES) benefits which can underpin remote community resilience
- 4) community policy development and community resilience outcomes in north Australian and adjacent regions

BUILDING COMMUNITY RESILIENCE IN NORTHERN AUSTRALIA

Project Team

Resilience and governance

Dr Bev Sithole (ARPNNet)

Hmalan Hunter-Xenie (ARPNNet)

ARPNNet Practitioners

Mr Glenn James (NAILSMA)

PES

Dr Kamaljit Sangha (CDU)

Prof Jeremy Russell-Smith (CDU)

Prof Bob Costanza (ANU)

Cluster Lead End User

Suellen Flint (WADFES)

PROJECT ACTIVITIES

- 1) Assessment of resilience and EM governance issues at two remote NT communities, Ngukurr and Gunbalanya
- 2) 2015 post-cyclone assessment in NE Arnhem Land
- 3) Assessment of PES opportunities in remote communities and regions
- 4) Developing agency & institutional linkages across northern Australia, and with other researchers

ARNet researchers undertaking preliminary assessments (scoping study)

2 teams of community-based indigenous researchers have been trained in Ngukurr and Gunbalanya [16 community based practitioners from ARNet]

NGUKURR

(on Roper River 300km south-west of Katherine, NT)

GUNBALANYA (Oenpelli)

NGUKURR & GUNBALANYA SCOPING STUDY

1) ARPNet—In-depth interviews with 194 community members (~10% sample)

2) NAILSMA—

(a) Review of remote Indigenous community governance issues

(b) Mapping of hard and soft infrastructure

3) CDU—assessment of PES opportunities

NGUKURR & GUNBALANYA SCOPING STUDY—MAIN FINDINGS

ARPNet—

- People see themselves as highly resilient to many adversities,
- But that resilience is “often challenged by government ineptitude and failed policies”

NAILSMA—

- Review reinforces failings of ‘top down’ approaches,
- Soft infrastructure cultural assets (e.g. kinship system) should be seen as social capital, not as a vulnerability

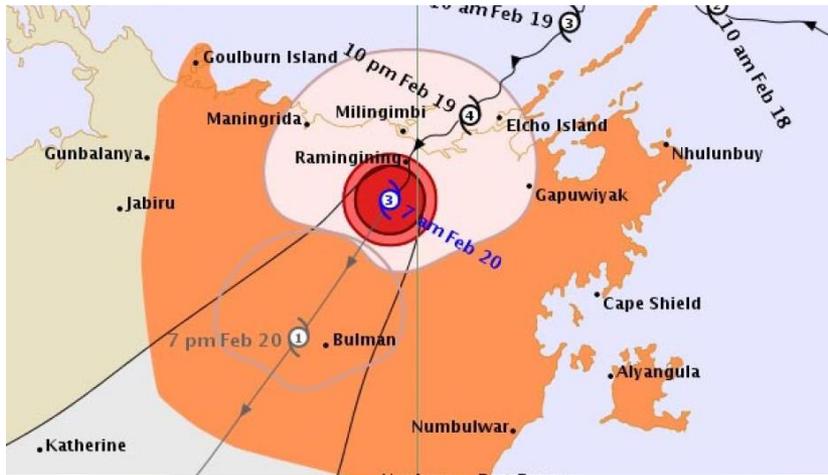

CDU—

- Substantial opportunities for developing a viable land management economy (e.g. ‘savanna burning’),
- Trained ranger groups can provide an effective community asset in times of EM needs

NGUKURR & GUNBALANYA SCOPING STUDY—RESOURCE DOCUMENTS

- *Living with Widdijith - Protocols for building community resilience* (**Sithole et al., ARPNet**)
- *Literature review on community resilience in remote north Australia* (**NAILSMA**)
- *Community asset mapping report* (**NAILSMA**)
- *Evaluating resilience in two remote Indigenous Australian communities* (**Morley et al., UNE**)
- *Building the resilience of remote Indigenous communities in northern Australia* (**Sangha et al., CDU, NAILSMA, ARPNet**)

NE ARNHEM LAND 2015 POST-CYCLONE ASSESSMENT—CYCLONE LAM

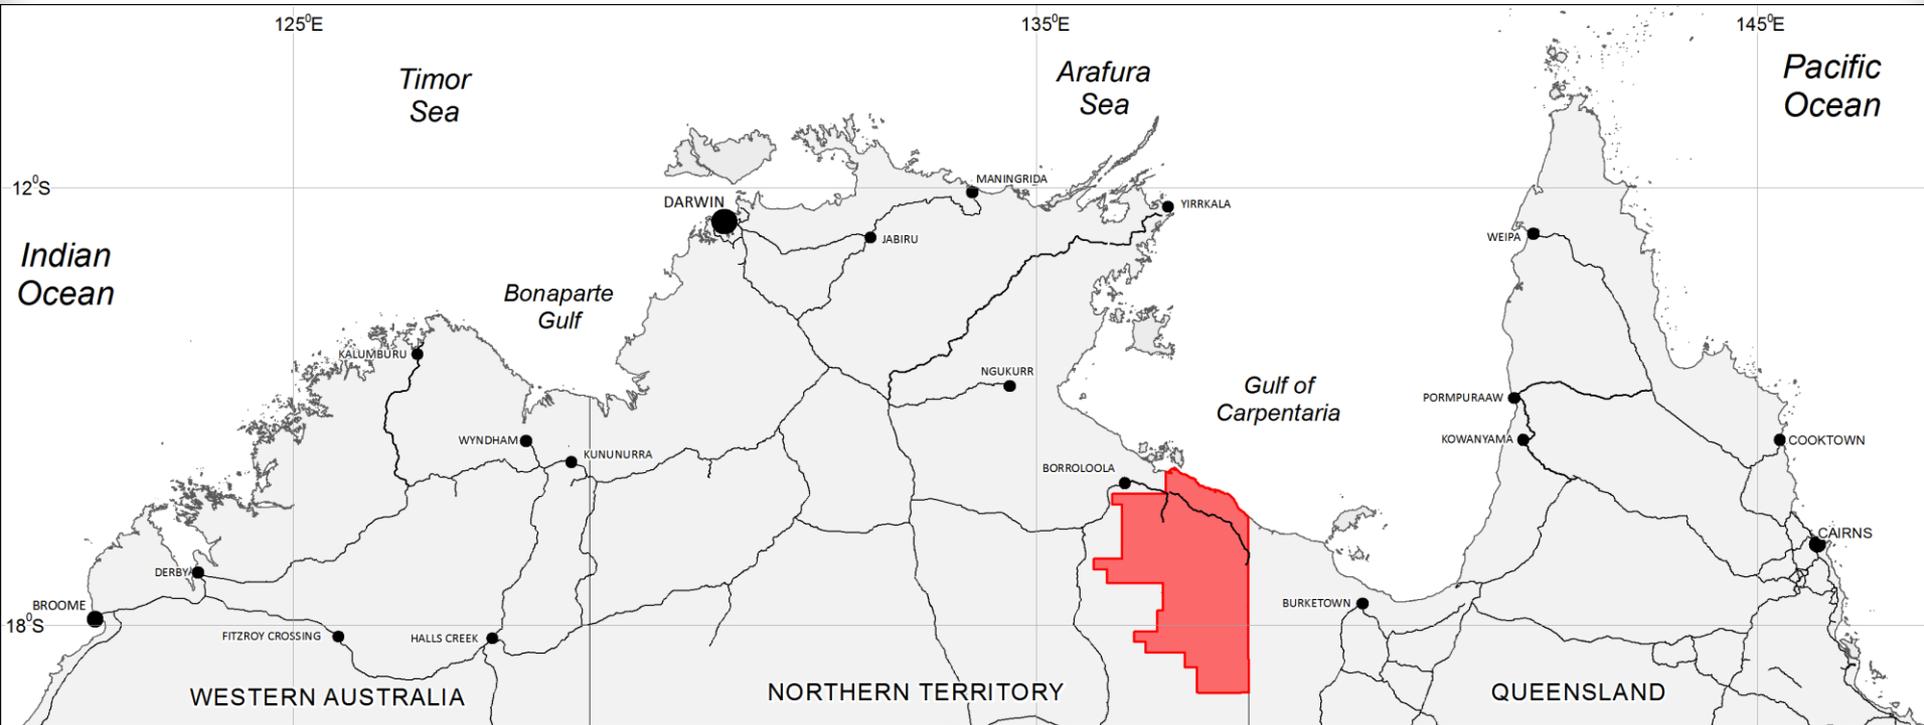

NE ARNHEM LAND 2015 POST-CYCLONE— BURRUMALA (STRONG WIND) PROJECT

- Community-led research project involving Yalu community leaders and researchers, NAILSMA, Australian Red Cross
- 40 interviews conducted to date
- Intention of building a strong organisational 'community interface' that can partner with external agencies (including EM)

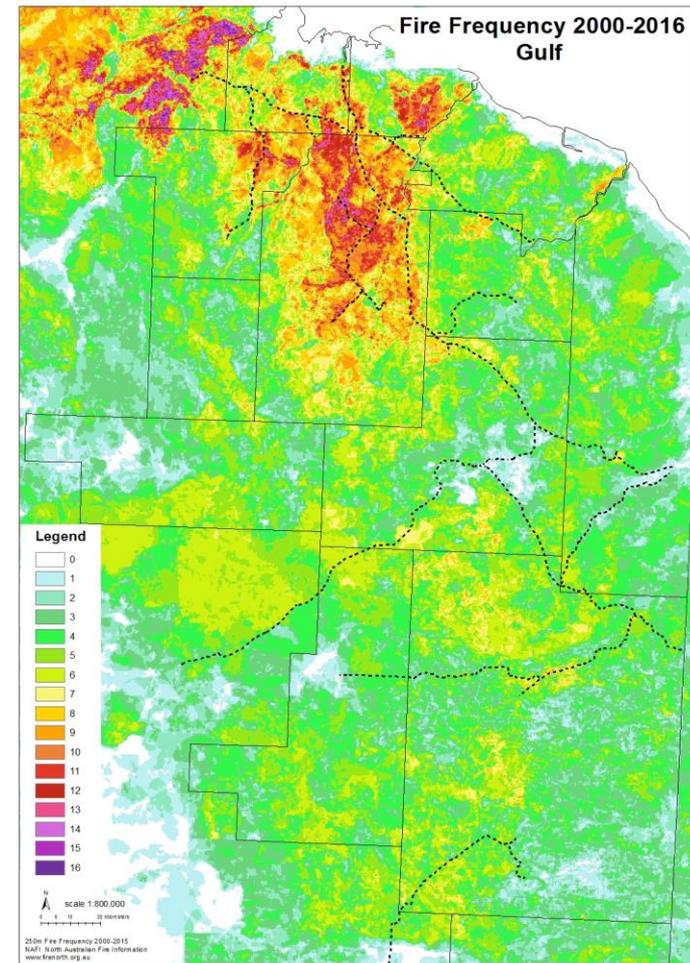

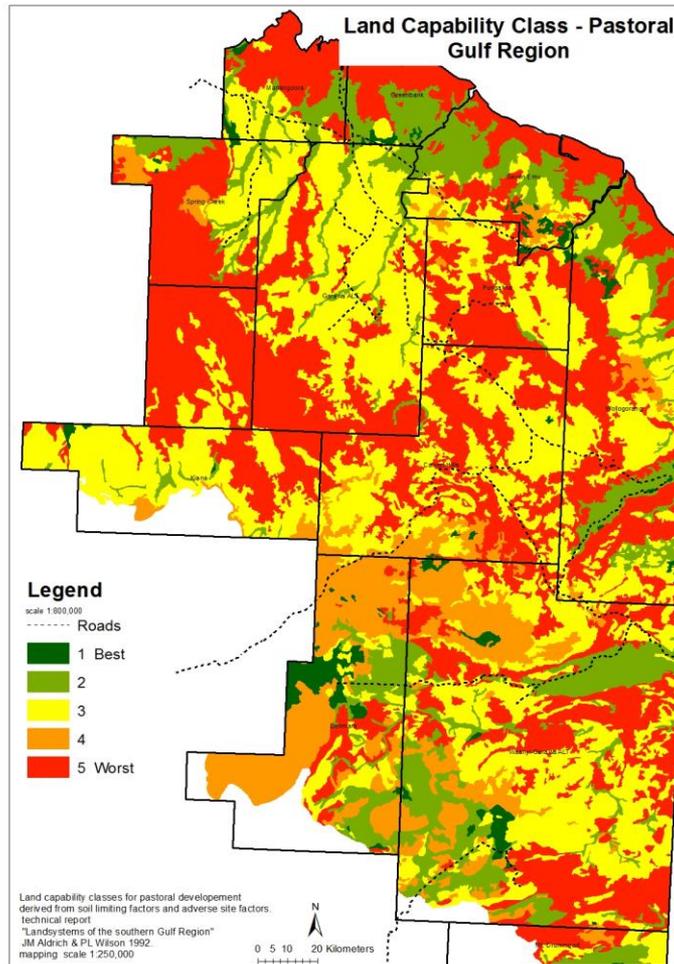

ES & PES PROJECT COMPONENTS

- 1) Contribution to Ngukurr and Gunbalanya study--complete
- 2) Assessment of ES and PES opportunities at Fish River Station (Indigenous property in NT)—ready to submit to journal
- 3) Ongoing assessment of ES & PES for north Australian estate—as chapter contribution to forthcoming book

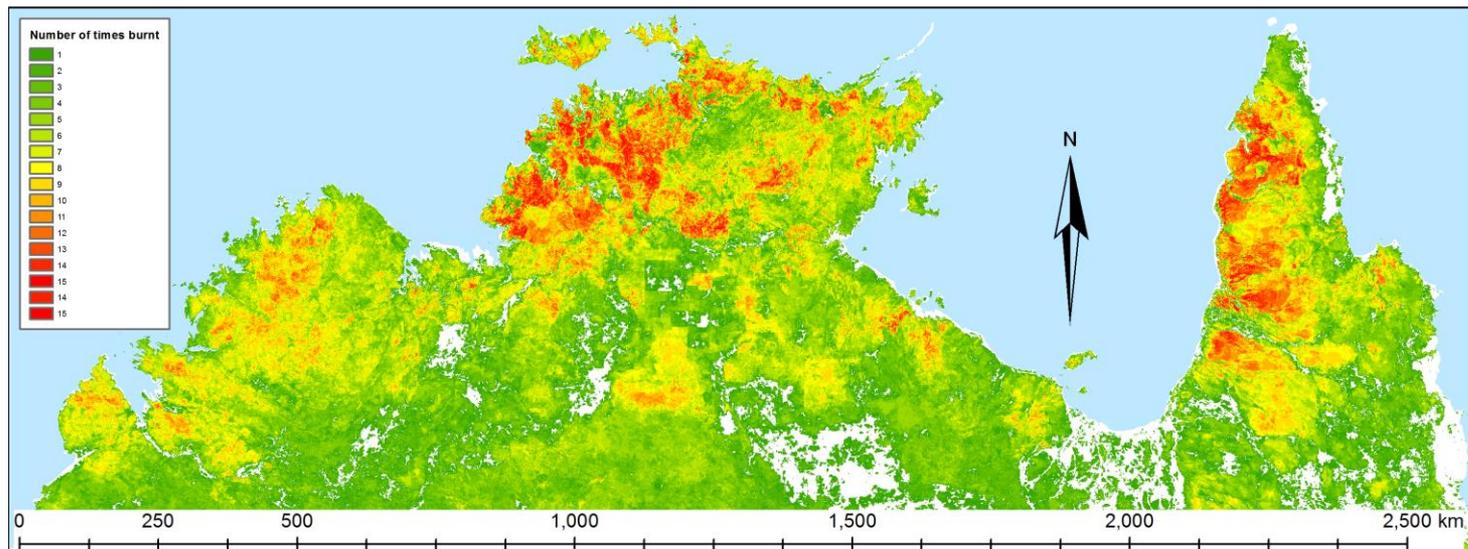

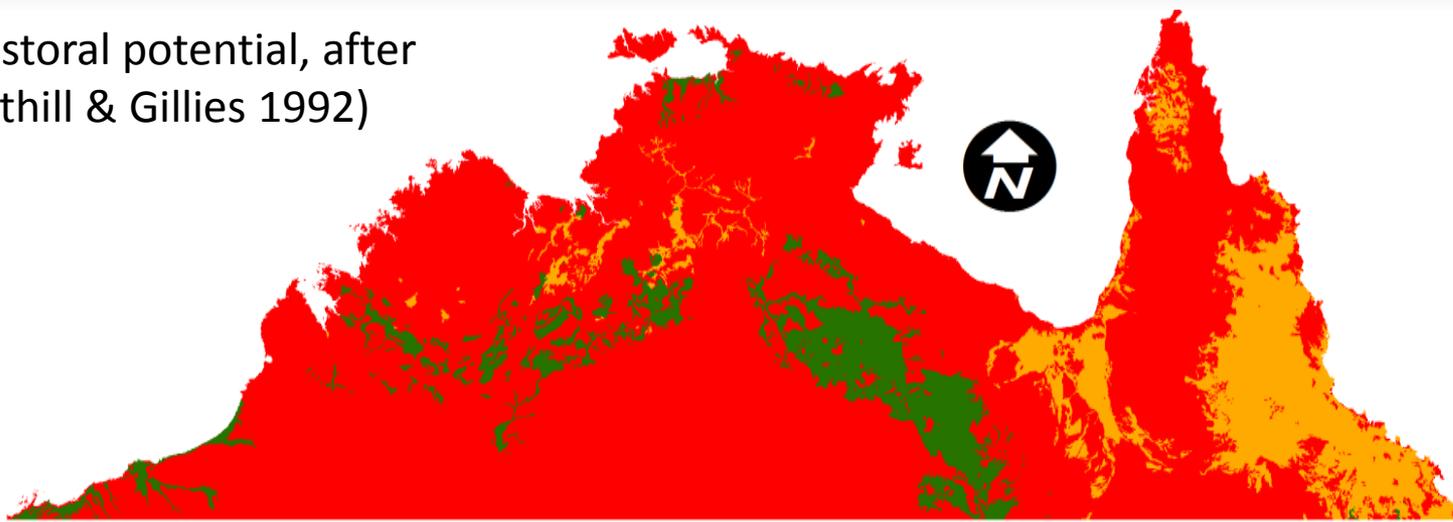

ES & PES PROJECT COMPONENT—NT GULF REGIONAL CASE STUDY EXAMPLE

ES & PES PROJECT COMPONENT—NT GULF REGIONAL CASE STUDY EXAMPLE

Pastoral potential, after
Tothill & Gillies 1992)

MAJOR MILESTONE OUTPUT DUE 2017: *A sustainable future for north Australia*

CHAPTERS

- 1) Cultural landscapes of north Australia
- 2) History of land dispossession and land rights
- 3) Status of the regional economy
- 4) A diversified ecosystem services economy**
- 5) Pathways to empowering Indigenous resilience and capacity**
- 6) Policy and investment challenges for regional development**
- 7) What future do we want?

UNDERSTANDING RESILIENCE & GOVERNANCE CHALLENGES: DEVELOPING INSTITUTIONAL LINKAGES

Darwin February 2016

UNDERSTANDING RESILIENCE & GOVERNANCE IN REMOTE INDIGENOUS COMMUNITIES: NEXT STEPS & UTILISATION CHALLENGES

- 1) Build on developing institutional linkages to assemble an ongoing north Australia-wide understanding of resilience & governance challenges—e.g. lessons from current project, WA and QLD engagement experience, QLD EM assurance framework
- 2) Use materials assembled through current project to implement scenario planning activities in select north Australia communities—to empower community-agency partnerships
- 3) Build the capacity / enterprises of Indigenous ranger groups to be front-line EM resource

These same principles espoused in COAG (2011) report addressing EM issues affecting north Australian Indigenous communities
